-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: element 10 is not seen in the Figures (page 4, line 21). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Basso (5,413,348). Basso discloses a golf tee construction comprising a sleeve member (12), a pointed base section (20) and a crimped portion (note Figure 4 and column 4, lines 44-56 and element a-a). Basso particularly teaches for the tee to bend about line a-a in response to impact. Basso also teaches for the sleeve portion to be of a rubber material that is resilient.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helleu in view of Basso. Regarding claim 1, Helleu shows a golf tee comprising an elongated sleeve (5) and a pointed base section (1). Note Figure 1 showing the sleeve portion constructed of a flexible material. It would have been obvious to one of ordinary skill in the art to form the sleeve portion of Helleu with a crimped portion as taught by Basso in order to facilitate deformation of the sleeve about a particular point.

Regarding claim 2, Helleu includes a tee member (2) having a circular head and a stem portion (4). Figure 1 shows the stem portion tightly received in the cavity of the sleeve.

Regarding claims 3 and 4, it would have been obvious to one of ordinary skill in the art to form the tee from wood or plastic in order to take advantage of those materials' well known physical characteristics.

Regarding claim 5, note Figure 1 showing the bending of the sleeve member.

Regarding claim 6, note the rejection of claims 1, 2 and 5.

Regarding claim 7, note the rejection of claims 1 and 5.

Regarding claim 8, note the rejection of claim 2.

Regarding claims 9 and 10, note the rejection of claims 3 and 4.
